**MARK BARNETT**  
ATTORNEY GENERAL

**LAWRENCE LONG**  
CHIEF DEPUTY ATTORNEY GENERAL

September, 2001

The Honorable William Janklow  
Governor of South Dakota

and

Members of the South Dakota Legislature

The annual report of the Law Enforcement Officers Standards and Training Commission, as required by SDCL 23-3-33, is hereby submitted.

2001 marks the twenty-eighth year in which Law Enforcement Training has been in operation at the Rol Kebach Criminal Justice Training Center. Law Enforcement Training is continuing to improve and expand its programs in order to better serve the needs of local law enforcement agencies throughout the state.

The continuing support of the Commission, Governor and members of the legislature, is very gratifying and will result in improved law enforcement service throughout the state of South Dakota.

Sincerely,

DOUG LAKE  
Chairman  
Law Enforcement Officers  
Standards and Training Commission

DL:sjc

# STATE OF SOUTH DAKOTA

## LAW ENFORCEMENT TRAINING

The South Dakota Law Enforcement Standards and Training Commission would like to express sincere thanks to all law enforcement agencies; officers; and telecommunicators who have assisted in making the law enforcement training program successful.

If it had not been for the hours of dedicated service supplied by various law enforcement agencies; officers; and telecommunicators, the training program would not have been a success.

The Commission is also grateful for the confidence given them by the Governor's Office and the South Dakota Legislature.

## LAW ENFORCEMENT OFFICERS STANDARDS AND TRAINING ACT

The Law Enforcement Officers Standards and Training Act contained in SDCL 23-3 became effective October 1, 1971. All law enforcement officers were "grandfathered" if they were employed as such on October 1, 1971. The Law Enforcement Officers Standards and Training Commission was created and was given the power to promulgate rules, require submission of reports by law enforcement agencies, establish minimum curriculum, approve training programs, and perform other administrative functions.

The Commission was also given the power to administer grants, establish training programs, reimburse expenses to officers, and set qualifications of law enforcement officers.

The Division of Criminal Investigation was designated to coordinate and administer the law enforcement training program, and to operate the Law Enforcement Training Center which is now known as the Rol Kebach Criminal Justice Center.

## COMPLIANCE WITH MINIMUM STANDARDS

All full-time and part-time law enforcement officers and telecommunicators are required to be certified within their first year of employment, including elected officials.

As of July 1, 2001 there are 1,582 law enforcement officers in South Dakota. Of the 1,582 law enforcement officers, 1,477 officers are certified. The 105 officers who are not yet certified are within their first year of employment.

As of July 1, 2001 there are 352 telecommunicators in South Dakota. Of the 352 telecommunicators, 312 are certified. The 40 telecommunicators who are not yet certified are within their first year of employment.

It is estimated that there is a 15% turnover in municipal and county law enforcement. Turnover has remained fairly constant over the last year.

## FISCAL YEAR 2001 OVERVIEW

Once again Law Enforcement Training (LET) had a busy year, and saw exemplary work by all the LET staff. Many innovative changes have occurred and it is difficult to decide where to start. But, the most sweeping change was to the Law Enforcement Basic Certification Course, as it went from an 8-week program to a 12-week program. The 12-week program now consists of 518 hours, with a major revamp to the curriculum.

Three applications to attend the law enforcement basic course were denied. A total of eleven students were dismissed/left the law enforcement basic courses. The reasons they withdrew from the sessions were as follows:

• Academic failures	7
• Terminated by their department	1
• Rules violation	1
• Suspended	1
• Left due to illness	1

The Law Enforcement Standards and Training Commission was busy and had six people appear to make requests, or appeal decisions. The dismissal of the student for cheating during firearms qualification was appealed to the Office of Hearing Examiners and the final decision is still pending at the time this report was prepared.

The three common threads now incorporated into the basic course are community oriented policing, ethics, and communication skills, both verbal and written. These common threads are reinforced throughout the 12-week program.

A communication skill practicum is now required of all basic training students. The practicum is assigned following the completion of the interpersonal, public speaking, and tactical communication skills block. This includes a 5-minute prepared presentation and a 1-minute impromptu speech. The objective of both practicums is to build public speaking confidence in a prepared situation, in addition to spontaneous speaking under stress. A written essay is also required to assist in the enhancement of written communication skills.

Each student was previously required to do a minimum 5-hour community-policing project while attending the academy. This project has now been increased to 8 hours. The community-policing project continues to be a success and helps instill a community policing philosophy in every student. In addition it makes the academy a good partner with the Pierre and Fort Pierre communities. Students attending the academy have invested thousands of hours of service into the local community.

Another significant change was the implementation of a curfew on students attending the basic course. All students are now required to be in the dorm by 10:30 PM, Monday through

Thursday of each week. The curfew has proven to be a positive step in the continuing effort to present a professional image in the classroom and community. Additional purposes include improving classroom readiness, maintaining ethical standards, and reducing potential risky behavior. Some departments have recognized the curfew as a building block for their own rule compliance once the students return to duty. Many students, instructors, and agency supervisors recognize the proactive value of the curfew and have been very supportive of the concept.

Several new and innovative pieces of training equipment were purchased for use by students in the basic course and advanced training programs. Each of them will be discussed in detail in the following paragraphs.

Simunitions is a company that supplies cutting edge technology for firearms use of force training. Students use duty weapons that are either customized, or have barrel inserts placed in them, and this allows the weapon to fire a normal size cartridge that is a marking round. When the marking round strikes a student it leaves a colored paint mark indicating where the student was hit. LET spent over \$30,000 purchasing a large assortment of protective gear, weapons, and gun conversion kits.

The Simunitions training is extremely realistic and is an excellent instructional tool for training students on judgment and tactical considerations.

The defensive tactics block of instruction was increased from 16 hours to 40 hours. The

hours provide students with their Pressure Point Control Technique (PPCT) certification.

With the increase in

time, additional equipment was required. Padded mats were purchased so the instruction could be provided in the National

Guard Armory, which is located next door to the academy.

Another component added to the defensive tactics is the equipment supplied by a company called Redman Defensive Tactics.

## Instructor Suit

## Student Gear

The equipment consists of padded student and instructor suits that allow for more realistic training scenarios, but minimize injuries to participants. The cost of this gear was about \$18,000.

Digital cameras were purchased for student use during the crime scene practical. A total of 10 cameras/cases were purchased for about \$10,000. The cameras allow for the students to process a mock crime scene and upon returning to the classroom the photographs can be projected onto the screen and discussed. The crime scene practical has been a valuable training tool.

The 911 program continues to expand. We will certify our eighth session in December 2001. The program has been widely accepted by the communication centers. With each session, there is more input and suggestions to enhance our curriculum.

In February, we purchased five 911 Training Simulators. The systems are a portable multi-tasking mini console for call taking and dispatching. Audio in and out allow for added sound effects, input of taped calls and recording of student work for evaluation or training. We have incorporated training on the systems for each student during the Two Week Basic sessions. Local agencies are also encouraged to utilize the simulators back at their home agencies in their own training programs.

A total of three students were dismissed from the 911 basic courses. The reasons the students withdrew from the course were as follows:

- Academic Failure 2
- Failure to complete make-up work 1

The Emergency Vehicle Operations Course (EVOC), has been undergoing expansion the past two years. The bid was awarded for the expansion and the work will be completed in the next fiscal year. Once completed, this will be a state of the art facility.

The SkidCar System represents a proven concept in driver training, that the manufacturer calls, “The science of controlled driving”. The concept is based on the idea that a driver who subjects their vehicle to physical forces, and that it is the driver’s ability to make sound judgments that minimize risk and maximize personal performance behind the wheel. The driver can learn to control the forces that elevate risk, or better yet, learn how to avoid high-risk situations.

SkidCar is a steel frame that attaches to the suspension of a vehicle. This used in conjunction with an electro-hydraulic pump, raises and lowers the tires from the road surface. Allowing for the duplication of various speeds and traction conditions while traveling between 6 mph and 25 mph. An instructor, who is riding with the student, operates the system.

Innovative and effect are good words to describe the SkidCar system. The system provides an affordable method of training and is used by agencies from around the world. In today's legal environment, it is critical to properly train officers for the hazardous training conditions they will face when on the job. The system cost \$ 40,000.00 and will be an excellent addition to all basic and advanced Emergency Vehicle Operations Courses (EVOC).

The Drug Abuse Resistance Education (DARE) program continues to grow in South Dakota. The support for the programs taught from Kindergarten to 12<sup>th</sup> grade, is shown by the fact that 98% of the 144 school administrators responding, indicated that it was a good or very good idea DARE should be continued in their schools.

DARE has grown significantly in the Middle School/Junior High area. The curriculum was delivered to nearly 1,200 students. The growth into new grade levels is essential for retention of the anti-drug and violence message.

The D.A.R.E. program impact for the year is represented by the following:

- D.A.R.E. Officers 141
- Cities with D.A.R.E. 132
- Schools with D.A.R.E. 214
- D.A.R.E. Students FY 00 14,134

Law Enforcement Training has been expanding its partnership with Tribal and Bureau of Indian Affairs (BIA) law enforcement agencies. More Tribal officers have been attending the Basic Certification Course, which saves them having to travel out of state to obtain the training. Tribal and BIA officers participate in a wide variety of advanced training programs sponsored by LET. BIA officers are now assisting with instruction at the academy.

There has been much discussion over the past year to seek federal funding to build an addition onto the current academy. This expansion would meet the basic training needs of all the law enforcement officers in South Dakota. All Tribal officers would have the option of attending training closer to home, as opposed to traveling to New Mexico. No plan has been solidified, but discussions are continuing.

## GRANT TRAINING

In 1992, the legislature increased the monies provided by LEOTF to training. With the additional money, Law Enforcement Training developed a grant program to help distribute the new training monies equitably. State, County, and Local law enforcement, not already receiving monies from liquidated costs, are allowed to apply for the money by defining their training needs in the form of a grant. Specific guidelines and rules establish what the monies can be used for. Each grant application is reviewed by the Standards and Training Commission to ensure that it meets the guidelines. The Commission is also the governing board that approves or rejects the applications. Priority is given to grants targeting the most essential training reaching the largest audience for the most effective cost expenditure.

The following represents a breakdown of the grants awarded FY 2001.

## TRAINING CENTER ACTIVITIES

Other organizational groups conducted various training seminars and meetings at the Rol Kebach Criminal Justice Center during FY 2001 for a total of approximately 1,000 people.

National Guard	State Radio
Attorney General's Office	Crime Lab
Emergency Management	Bureau of Personnel
Sheriff's Association	South Dakota Highway Patrol
LEIN	South Dakota Peace officers Association
NIBRS	Other Agencies

## EXPENDITURES AND FINANCING

The total expenditures for fiscal year 2001 were \$ 1,063,870.23. This includes all academy training, field training, in-state and out-of-state training.

The money for the South Dakota Law Enforcement Training Program is derived from a portion of the fines paid by violators of the law. The amount of money derived from fines is allocated to the individual program by statute and made available through legislative appropriation.

## SUMMARY OF FY 2001

During FY 2001, 139 officers enrolled in the General Law Enforcement Training Session applying for certification as required by SDCL 23-3, and 128 were certified; seven officers were dismissed for academic failure; one officer dismissed for termination of employment by department; one officer dismissed for rules violation; one officer suspended from the basic training course; and one officer left due to illness. A total of 4,074 officers were trained in FY 01.

A total of 17 officers requested reciprocity certification, and 4 were granted certification based upon the completion of an equivalent training program. Six officers failed the reciprocity exam; and seven officers are scheduled for completion of requirements.

For FY 2001, 61 telecommunicators enrolled in the Basic 911 Training Session applying for certification as required by SDCL 34-45, and 58 were certified; two were dismissed for academic failure; and one is incomplete.

During FY 01, reserve unit records at Law Enforcement Training indicated there are 21 reserve units in South Dakota with a total of 200 officers; 155 have met reserve officer certification; 45 reserve officers have not yet completed all of the departmental reserve training requirements.

## ANNUAL REPORT 2001

**OFFICE OF ATTORNEY GENERAL – DCI – LAW ENFORCEMENT TRAINING ARE  
NOW ON THE INTERNET !**

**[www.state.sd.us/atg](http://www.state.sd.us/atg)**

**After months of anticipation and hard work Law Enforcement Training is pleased to see the nearing completion of this web site. In months to come, new information will become more accessible to law enforcement agencies and the public. The web site is organized so the user may quickly retrieve the information needed.**
